PROFILE

Software Engineer building web and mobile applications in logistics, education, and e-commerce. Specialized in end-to-end development using Node.js, React, Flutter, and modern cloud technologies. Skilled at creating real-time, data-driven systems to streamline operations, boost user engagement, and solve practical business problems.

EXPERIENCE

MIS Officer

OCT 2022 – JUL 2025

Silah Gulf · Bahrain

- Built Power BI dashboards and automated SQL reports for executive and operational use.
- Reduced reporting time by identifying and fixing performance bottlenecks in data pipelines.
- Provided technical support for internal teams working with business intelligence tools.

IT Specialist

OCT 2022 – JUL 2025

6 Pence · Bahrain

- Developed a legislative management platform using Next.js, Node.js and MariaDB.
- Worked across the stack including UI, API design, and database modeling.
- Shifted the codebase to TypeScript and introduced better testing practices.
- Supported deployment and maintenance of the platform in production.

System Developer

SEP 2019 – OCT 2022

UBEX Courier Services · Bahrain

- Built a multi-user logistics system using Laravel, Vue.js and Flutter.
- Implemented real-time dashboards, mobile apps and automated dispatch workflows.
- Designed and optimized database schemas to handle delivery data and reporting.

Web Developer (Part-time)

JAN 2017 – SEP 2019

Al-Haddad ITS · Bahrain

- Handled full stack delivery including frontend and backend work.
- Built and maintained WordPress-based websites with custom integrations.

Customer Service Representative / Lead Agent

SEP 2015 – SEP 2019

Silah Gulf · Bahrain

- Resolved customer issues and helped train and support new agents.

Hussain Tawfiq AlHaddad

Software Engineer

University of Bahrain

2009 – 2015 · BAHRAIN

High School Diploma

Modern Knowledge Schools

2006 – 2009 · BAHRAIN

LANGUAGES

English

Arabic

SELECTED PROJECTS

The Coin Flip

IOS APP — APP STORE

- Designed and developed a full-featured iOS utility app published on the App Store.
- Implemented 3D coin flip animation with tap, swipe, and shake input methods.
- Built flip history tracking with timestamps and a home screen widget.
- Integrated in-app purchases for premium coin skins and Google AdMob ads.

Sales System

FULL-STACK WEB APP

- Developed a modern sales management system with responsive frontend using Next.js, TypeScript, and Tailwind CSS.
- Built robust backend API with Node.js, Express, and MySQL for comprehensive data handling.

Personal AI Chatbot

PERSONAL PROJECT

- Developed an AI-powered chatbot that conducts conversations about professional background and CV.
- Built with Next.js, TypeScript, Tailwind CSS, and ShadCN UI components.
